

Réseau des Centres d'expertise industrielle du Québec is a network of industrial expertise centres that provides **Desjardins members with impartial support for their digital shift** while allowing them to benefit from valuable subsidies.

Advantage for Desjardins members

Desjardins members enjoy a discount of up to 75% on the professional rates of digital shift experts and their partners.

DesjardinsMD and associated brand names are trademarks of the Fédération des caisses Desjardins du Québec.

Types of services offered

Strategic and technological support

This form of guidance is generally aimed at helping the company carry out its projects with a view to ensuring it is able to meet its strategic and operational objectives. In the form of a bank of hours, RCEI's experts offer support and personalized coaching so that all stages of the digital shift are successful. The company's availability and abilities are taken into account when making recommendations and companies are accompanied regardless of their degree of digital maturity.

Highly subsidized blocks of hours are offered to companies that are Desjardins members.

Technological demonstrations

The four Industrial Expertise Centres have technology showcases that are available to companies. Visits to these showcases allow companies to interact and experiment with technological solutions that are made for the vast majority of Québec companies. These demonstrations are useful for companies that are ready to invest in a technological solution but wish to compare several technologies before committing and investing—or for companies that wish to make a digital shift, but do not know where to start.

Training and support programs

The four Industrial Expertise Centres also offer programs that include a combination of support and training. Several of these programs are available to Desjardins members.

A few examples:

- Ensuring a successful digital transformation program
- Data enhancement program
- 4.0 circuit program
- Organizational excellence program

The Digital Transformation Offensive (OTN - Offensive de transformation numérique)

Within the framework of the Digital Transformation Offensive, Québec's four Industrial Expertise Centres are backed by the *Ministère de l'Économie et de l'Innovation* in providing guidance to over 1,000 businesses over a three-year period. This project, known as *Virage PME*, mobilizes the Industrial Expertise Centres around support to businesses.
